

Energy Management Training for State Agencies and Higher Education Institutions

facilities, maintenance and management staffs

Session #4: Retro-Commissioning

January 10, 2007 – 10:00am – 11:30 am

During this no-cost, interactive tele-conference you will:

- Learn how to identify opportunities for retro-commissioning to maximize operations and improve comfort and productivity.
- Get timely tips for managing retro-commissioning projects.
- Learn about the latest in retro-commissioning approaches and cost/benefits.
- Learn effective strategies and get real world experiences/results from energy/facility managers in state department and higher education facilities.
- Enhance your skills.
- Share your experiences with your peers in the interactive session.
- Expand your network of resources.
- Learn about Rebuild Colorado's many resources and technical services available to help in new building design, existing building upgrades, and energy management.
- Receive a certificate of training for Professional Development Hours.
